

Pumps, aerators, mixers, blowers, screens

ShinMaywa Industries, Ltd.

Summary of technology

- Continue to be selected as the best partner in the design, construction, operation and maintenance of water treatment facilities by proposing optimum products such as submersible sewage pumps, aerators, mixers, blowers and screens which are indispensable in the process.

Variety line up of wastewater treatment equipment

Products

Technology features / advantages

- Technology features / advantages
- Submersible pump : Extensive impeller line up that have both solid passing capability and efficiency
- Aerator : Saving maintenance by directly connecting motor without gear
- Mixer : Energy saving by high efficiency motor and propeller
- Blower : Optimum line up from high efficiency, Low noise and submersed type
